## **Completion of Third Phase Drill Programme at Coogee**

Victory Mines Limited (“Victory”) or (“the Company”) is pleased to announce that the Company’s third phase RC drill programme at the Coogee Project which commenced on 10 June 2021 was completed on 8 August 2021. The RC drill programme was aimed at delineating the northern extension of the two gold-copper trends north of the Coogee Pit, as well as developing more of an understanding of the previously identified copper-gold porphyry target at Coogee North located immediately to the north-east.

A total of 51 holes for 7,199 metres have been completed. The drill holes have ranged in depth from 48 to 227m.

All four metre composite drill samples have now been dispatched to the laboratory for analysis and results are awaited.
